

Pneumatic Die Lifters DLB – Balls

Note:

Measure B need to be 22 mm minimum otherwise we will not be able to manufacture this model.

Please measure A, B, C and D (see drawing).

We make Die Rollers to your T-slot dimension.

Note : Balls have much higher friction compared to wheels (standard Die Roller) this means that the force it takes to push/pull a Die can be several times higher.

Product	Capacity
Die rollers with Balls – T-22	1000 kg/m
Die rollers with Balls – T-28	2000 kg/m
Die rollers with Balls – T-36	About 2500 kg/m
Must be confirmed after T-slots dimensions supplied
